Flooring Trim Solutions

NOTE: photos below are examples only and may not represent what is available in each product line. See available trims below.

Quarter Round is most commonly applied to cover the expansion gap between the flooring and the wall.

End Cap (often times called Square Edge or Threshold) is most commonly used when butting up to carpet or a sliding glass door.

T-Mold is used when joining two floors of equal height, such as in a doorway, between two rooms or in a large area where the maximum length/width is exceeded.

Stair Nose is used when ending flooring at the top of either a landing or downward staircase.

Reducer is used when ending the flooring onto a surface such as concrete.
