

The Latitudes TE Story

Our Latitude TE hardwood collection is a beautiful 1/2" Thermal Enhanced Engineered European Oak. The thermal enhancement is a natural eco-friendly heat process applied to the wood that amplifies dimensional stability and natural patina of Mother Nature's alluring creation. This process makes the wood 70% less susceptible to moisture and humidity changes, therefore more structural reliability than traditional hardwood products.

Canoe Point

Latitudes TE Construction

Benefits:

- Thermal Enhanced - heating process amplifying dimensional stability
- 70% less susceptible to moisture and humidity changes
- Richer hues and more uniform color throughout
- UV Cured High Performance Alum Oxide finish protects floor from wear and damage
- Wide variety of color and grain variation from board-to-board
